### Highlights

- **PacMoz is a profitable and self-funding entity that offers a broad suite of business support services including company registrations, permits and licences, HR (immigration/visas, recruitment, labour contracts and payroll), legal and financial services.**
- **Fee structures have been benchmarked and revised upwards since the acquisition to align (while remaining competitive) with PacMoz's local competitors. This will significantly bolster PacMoz's financial performance.**
- **Strong and growing customer base of local and international clients, as attached.**
- **Established offices in the capital Maputo, the major regional centres of Beira and Nacala, and a fourth to open in Pemba in coming months. Pemba is the focal point for the development of Mozambique's LNG industry in the north of the country.**

Rubicon's strategy remains: the further growth of its sustainable **cash flow business** base; establishing itself as a **leading service provider** to the resources, construction and oil & gas sectors; and leveraging our position with a watching brief on **mineral resource opportunities**. Rubicon in Mozambique will **differentiate** itself from the competition by addressing the challenges of **local content**.

Rubicon will maintain its core focus on the resources sector and plans to use any cash flow from the PacMoz activities to rebuild its capital base and use PacMoz's expertise and experience in Mozambique to seek advanced resource project opportunities.

With its suite of business support services, PacMoz is the **foundation** upon which the next three business units will be built. These comprise a medical centre, a training facility and an accommodation camp (aligned to deliver our strategy) to service Mozambique's rapidly expanding mining and natural gas industry, and service their local administration requirements into the future.

Recognition of PacMoz's **capabilities** in Mozambique is rapidly growing, especially amongst international companies looking to establish themselves in-country as the resources and oil & gas-driven activities accelerate.

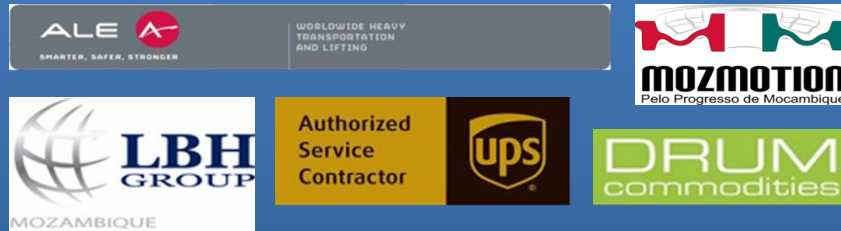

Rubicon and PacMoz are in the advanced stages of signing service agreements in Mozambique with other significant international companies, which will be the subject of further ASX announcements in the coming weeks.

Services provided:

**HR** – Contracts, payroll, immigration;  
**Financial** – accounting, management reporting;  
**Corporate** – project consulting, registrations, licences, permits, admin, secretarial;  
**Legal** – wide range of support.

## About PacMoz's Key Clients:

LBH Mozambique has been operating in-country for over 25 years with offices in all the major Mozambican ports, and provides port agency services, bulk logistics management, customs clearance and project management.

Drum Commodities, a UK company which is a 'Collateral Manager' offering a range of services that are 'risk mitigants' for each transaction. Their principal customers are the Trade & Commodity Finance teams of international banks who finance imports and exports of commodities in Africa and the Middle East. They also work for corporates and trade houses involved in commodity flows. They have operations in 30 countries, and their new Mozambique subsidiary already has 15 operations in place.

SB2 Logistics, Lda, is an Authorised Service Contractor for UPS, the largest package delivery company in the world.

Mozmotion, an international railway engineering and logistics contractor currently involved in the refurbishment of several companies' railway wagons operating in northern areas of Mozambique.

ALE, founded in 1983, is now one of the world's leading international heavy transport and installation contractors with a global network of operating centres and a large fleet of heavy cranes, specialist transport and installation equipment. They operate all over Mozambique.
