Highlights

- Norway-based, international project management and engineering resources provider **Competentia** joins the growing client list of Rubicon's Mozambican subsidiary, **PacMoz**.
- **PacMoz** will establish the operating entity for **Competentia** in-country and provide it with a broad range of business administration, immigration and human resources services, as well as local legal support.

Rubicon Resources Limited is pleased to count **Competentia** among its growing list of partners and clients in Mozambique. Rubicon's Mozambican subsidiary, **PacMoz**, has concluded a deal to establish a limited liability **subsidiary** of **Competentia** in Mozambique, and provide a range of business administration, human resources and immigration services, as well as local legal support, to this company. **Competentia** intends to extend its service offering into the region as Mozambique begins to develop its vast gas resources in the north of the country, by way of the southern hemisphere's largest LNG project.

Competentia provide experienced Project Management and Engineering and Supervisory resources to the oil and gas industry worldwide, specialising in Gas Liquifaction, Subsea and Floating Production. Their **client base** includes Apache, BG, BP, ConocoPhillips, ENI, INPEX, Lundin, Premier Oil, PTTEP and Total. **Competentia's** head office is in Norway, with further offices in Australia, China, Japan, South Korea, Norway, Singapore, Trinidad, UK and USA (and soon in Mozambique).

Geir Egil Olsen, **Competentia** Group Chief Executive: "Mozambique is in the process of becoming one of the world's biggest exporters of liquefied natural gas, and we are therefore extremely pleased entering into this strategic partnership with Rubicon Resources Limited subsidiary **PacMoz**. We are convinced the partnership will enable **Competentia** to successfully establish its first operation in Africa."

Richard Carcenac, CEO of Rubicon Resources: "Mozambique's LNG projects will require vast numbers of skilled personnel, many of whom will be sourced from other parts of the world while Mozambique builds its own skills base. **Competentia** and Rubicon offer complementary services which are of great value to the oil & gas project developers."
